'LYD' ORDER FORM

Accucraft (UK), on behalf of the Ffestiniog Railway, is delighted to offer you a strictly limited edition of 'Lyd' in 16mm (1:19) scale. The live steam model is based on our highly successful and very popular 'Lew' but incorporates all the small detail differences carried by 'Lyd', from the painted numbers and 'Lyd' name plates, the subtly different livery details and the unique Boston Lodge builder's plates. The model represents 'Lyd' equipped with her Lynton & Barnstaple cab profile and with her chimney set to the L & B loading gauge. The model is being produced exclusively for the Ffestiniog Railway by Accucraft (UK) and will only be available through the Ffestiniog shop or direct from Accucraft (UK). The retail profit from every model sold will go towards the final construction phase of the prototype loco and to keep her in traffic. There will be two versions in a strictly limited batch of 100 models, lined Southern green and fully lined British Railways black, each with its own numbered certificate of authenticity.

Accucraft's Lynton & Barnstaple Railway 'Lew' – for illustration purposes only

The model is internally gas fired and available either manually controlled or fitted with radio control. The engine is gauge adjustable for either 32mm ('0' gauge) or 45mm ('1' gauge) – the parts for this are supplied with the model; this operation can be undertaken by the owner and only takes a few minutes. The loco is supplied with blanking plates for the cut-outs in the frames but these are really for display only, severely restricting the choice of track curvature if used in operation. The cab roof lifts up to give access to the gas, water and lubricator fillers. The boiler is fitted with a water level check valve and the lubricator has an under floor drain. The model is fitted with slide valves. The cylinders are drilled, tapped and plugged to accept DJB Engineering's automatic drain cocks. The wheels are spoked and insulated as standard. The model is built from stainless steel and brass, and with the correct maintenance, will give a lifetime of pleasure. The first delivery of these models will be in November 2012.

Specifications:

- **Scale:** 16mm to 1 foot (1:19), Gauge: 32mm or 45mm
- **Length over couplings:** 420mm, width: 110mm, maximum height: 145mm
- **Boiler:** Centre flue, working pressure: 60psi
- **Reversing Gear:** Working Joy valve gear, slide valves, ready to fit drain cocks
- **Fuel:** Butane Gas
- **Boiler Fittings:** Safety valve, pressure gauge, water gauge.
- **Cab Controls:** Steam regulator, gas regulator, reverse lever, lubricator under floor drain valve.
