'TORNADO' ORDER FORM

Accucraft, the UK's leading producer of small-scale live-steam engines, and The A1 Steam Locomotive Trust, builder and operator of Britain's newest main line steam locomotive, are delighted to announce the production of a live steam, Gauge 1, model of *Tornado*. Constructed over a twenty year period, the prototype has written a new chapter in the annals of British steam, becoming the first main line steam locomotive to be built since 1960. Since making her first moves in 2008, *Tornado* has hauled the Royal Train three times, appeared on the BBC's Top Gear programme and run tens of thousands of miles on rail tours and preserved lines.

Accucraft's Peppercorn class A1 'Tornado' – for illustration purposes only

Accucraft's model faithfully captures the elegance and power of the Peppercorn class A1 design and carries all the details unique to *Tornado*. The model is gas-fired with slide valves and has all the features the Gauge 1 fraternity have come to expect from an Accucraft locomotive. The cylinders are fitted with drain cocks. The chassis is constructed from stainless steel. The boiler is copper, the cab and tender are constructed from etched brass. The UK RRP will be £2895.00 with a release date of December 2015 and the model will be available in apple green, blue and BR green. The images shown here are of the engineering sample. The retail profit from sales of this superb model will go to The A1 Steam Locomotive Trust to complete the financing of *Tornado* herself.

Specification:

- **Scale: 1:32**
- **Gauge: 45mm**
- **Length over buffers: 690mm (29½ inches)**
- **Width: 90mm (3½ inches)**
- **Height: 130mm (5¼ inches)**
